PROFESSIONAL SUMMARY

- Highly skilled and results-oriented Senior QA/Test Engineer with 4.6 years of experience in the STLC and SDLC. Possessing a strong understanding of quality assurance methodologies, testing techniques, and software testing principles. Proven track record of successfully leading and executing testing activities across multiple projects, ensuring the delivery of high-quality software products.
- Expertise in designing and implementing comprehensive test strategies, test plans, test cases, and test scripts for various types of software applications, including web-based, mobile, and desktop applications. Proficient in utilizing industry-standard testing tools and technologies to conduct functional, regression, performance, and usability testing.
- Demonstrated ability to collaborate closely with cross-functional teams, including developers, product managers, and business stakeholders, to identify and prioritize testing requirements, resolve issues, and ensure timely delivery of software releases. Skilled in conducting thorough defect analysis, triaging, and reporting, using defect tracking systems to track issues and drive their resolution.
- Experienced in leading and mentoring junior QA/Test Engineers, providing guidance on testing best practices, test methodology, and continuous improvement initiatives. Strong problem-solving and analytical skills, coupled with exceptional attention to detail, allowing for the identification and resolution of complex software defects.
- Excellent communication and interpersonal skills, enabling effective collaboration with stakeholders at all levels. Demonstrated ability to present test strategies, progress reports, and test results in a clear and concise manner. Committed to continuous learning and staying up-to-date with the latest trends and advancements in the field of software quality assurance.
- In summary, a dedicated and experienced Senior QA/Test Engineer with a passion for ensuring software quality and driving continuous improvement in the testing process. Proven ability to deliver high-quality software solutions that meet or exceed customer expectations.
