PROFILE

Java Developer with over four years of experience in building scalable and high-performance applications. Expertise in microservices architecture, **Spring Boot**, and **Java**, with a proven record of developing **RESTful APIs**. Proficient in agile methodologies and eager to bring my technical skills and passion for innovation to a dynamic, product-driven company.

SKILLS

Technical Language: Java
Frameworks: Spring MVC, Spring Boot, Hibernate, React Native, Spring Cloud
Tools: Git, GitHub, Maven, Postman, JIRA, BitBucket, Jenkins
Cloud: AWS (Lambda, API Gateway, EC2, S3)
Databases: MySQL
Development Methodologies: Agile, Microservices
Testing: JUnit, Mockito

WORK EXPERIENCE

Tata Consultancy Services   **December 2020 - Present**
Systems Engineer | Client: Logistics | December 2022 - Present

- Developed multi-threaded utilities for user migration using **Spring Boot**, reducing processing time by 30%.
- Executed CRUD operations for user data, ensuring comprehensive data management and reducing data discrepancies by 20%.
- Enhanced modularity by developing microservices using **Spring Cloud**, boosting performance by 10x.
- Implemented TDD practices using **JUnit** and **Mockito**, achieving 95% code accuracy.

Accenture | Application Development Analyst   **November 2019 - November 2022**
Client: Insurance | March 2022 - November 2022

- Developed handlers for Insurance-based compliant services using **Java** and **AWS Lambda**, improving system reliability by 25%.
- Created RESTful APIs utilizing **API Gateway** and integrated with AWS services, enhancing system reliability.

Client: Healthcare | November 2019 - February 2022

- Provided L2 and L3 support for multiple enterprise applications including healthcare applications and managed **SDLC** for each release.
- Managed technical issues related to the healthcare application, ensuring uptime and reliability for critical patient data.
- Upgraded applications with React Native and **Java 8**, reducing bugs by 18%.
- Conducted end-to-end testing using **JUnit** and **Mockito**, achieving 86% code coverage.

EDUCATION

B.E in Computer Science   **2015-2019**
North Maharashtra University
